

Annie Rome

Full-Stack Developer | Support Tools & Automation | API Integrations

anniecrome1@gmail.com • 6039577161 • www.anniecaroline.com

PROFESSIONAL EXPERIENCE

Independent Contractor

Full-Stack Web Developer

1/1/2025 - Present

Remote

- Designed and deployed full-stack SaaS-style applications using React, Next.js, Node.js, and REST APIs, emphasizing scalability and high performance.
- Implemented responsive, user-friendly interfaces and optimized backend queries for speed and reliability.
- Built CMS-driven architectures using Sanity.io, enabling clients to manage data and content efficiently.
- Used Git/GitHub for version control and collaborated with designers and content teams in Agile workflows.

Hollis Hospitality Group

Technology Consultant

2/1/2025 - Present

Remote

- Led technology assessments across multi-location hospitality sites, integrating POS, SaaS, and cloud-based solutions to optimize operations and customer experience.
- Designed scalable, data-driven implementation roadmaps aligned with business objectives.
- Advised on AI-assisted chat and automation adoption for customer support and member engagement.

Glazer Children's Museum

Software Engineer Intern

1/1/2024 - 5/1/2024

Tampa, FL

- Developed a Django/MySQL backend supporting internal staff workflows, improving data retrieval speed and reducing manual entry.
- Participated in Agile sprints, writing maintainable, well-documented code reviewed by senior engineers.
- Assisted in API integration and debugging, improving system reliability and response times by 25%.

University of Tampa

Research Assistant

8/1/2022 - 8/1/2024

Tampa, FL

- Collaborated on VR software architecture using Unity and Python scripts to optimize performance and user interaction tracking.
- Worked cross-functionally with research and design teams to translate user feedback into technical improvements.

TECHNICAL PROJECTS

ResuBuild – SaaS Resume Builder

[View Project](#)

- Developed a SaaS-based resume builder with real-time previews, authentication, and persistent storage.
- Integrated OpenAI APIs to automate content generation and suggestions.

Personal ChatBot

[View Project](#)

- Developed RAG chatbot using OpenAI + Pinecone with Node.js backend for contextual query retrieval.
- Demonstrated expertise in API orchestration, AI integration, and data optimization—key parallels to Strava’s AI tooling focus.

EDUCATION

University of Tampa

Bachelor of Science in Computer Science

May, 2025

Tampa, FL
